

**IN THE SPECIFICATION:**

Please replace paragraph [0054] with the following paragraph that corrects a mistake pointed out by the Office Action.

“Figure 12 - Operation”

**IN THE CLAIMS:**

The following is a current listing of claims and will replace all prior versions and listings of claims in the application. Please amend the claims as follows:

1. (Currently Amended) A computer-implemented method process-comprising:  
entry entering into a storage array, at a succession of date/time instances, a  
succession of records of electronic documents, wherein each of said records corresponds  
to one or more electronic documents~~some of which may have corresponding physical~~  
~~originals~~[[,]];

assigning assignment of attributes to each of the records in any data type formats  
that, wherein the assigned attributes characterize the documents corresponding to that  
record[[,]];

assigning assignment of a succession of unique date/time identifiers to the  
succession of records, wherein, for each record, the assigned unique date/time identifier  
is in correspondence with the date/time date and time of instances of their-its entry[[,]];

receiving selection of a range of date/time instances via a graphical user  
interfacethat correspond to a to a range of the records of documents that are known to be  
uncorrupted; and

receiving one or more attributes via said graphical user interface;  
selection of groups of electronic documents having logically related attributes  
within the range of the uncorrupted documents;

retrieving, from said storage array, one or more records corresponding to said  
received range of date/time instances and said received one or more attributes, wherein  
documents corresponding to said retrieved records are uncorrupted.
